Issue No. 020 | PB020/July/25

BIOCINCH®-AI2
with 0.7mm Tape Now Available!

EU-MDR

We are excited to announce the launch of our latest innovation in meniscus repair: **BIOCINCH®-AI2** with 0.7mm tape. This ground breaking implant marks a new era in meniscus repair, offering superior performance and improved clinical outcomes.

Product Features:

- First all-inside meniscus repair system with tape technology
- Features 0.7mm broad fiber tape to reduce tissue damage and enhance repair strength
- Ergonomic handle for precision and comfort
- 360° trigger for reliable anchor deployment
- High-performance biocompatible PEEK implants
- Versatile options: straight, 12° angled, 5° reverse curved, and flexible configurations

0.7 MM
Tape Technology
