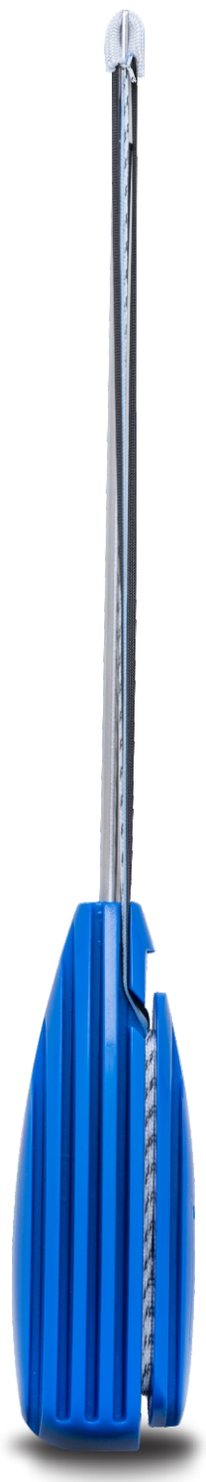
Knotless FIBERKNOT® 2.9 mm with 1.4 mm Tape

EU-MDR

Introducing the new Knotless **FIBERKNOT®** 2.9 mm with an additional 1.4 mm utility suture tape. The Knotless **FIBERKNOT®** 2.9 mm is equipped with two knotless locking mechanisms: a Chinese finger trap and a self-tying knot. These two locking mechanisms make for a robust knotless anchor. The added 1.4 mm utility suture tape makes this anchor very versatile in its application across various indications, from remplissage in the shoulder to a lateral extra-articular tenodesis in the knee.



Anchor Anatomy:

- Anchor size: 2.9 mm x 15 mm, after bulging 5.0 mm
- Anchor inserter shaft length: 150 mm
- Pull out strength: 352.5 N

PRODUCT BULLETIN

Key Features & Benefits:

- **Subcortical fixation:** The 2.9 mm **FIBERKNOT®** deploys into a 5.0 mm subcortical suture ball. This subcortical suture ball produces 352.5 N of tensile strength.
- **Knotless Repair Suture:** The USP 2 UHMWPE **BIOFIBER®** knotless construct is equipped with two locking mechanisms: a conventional Chinese finger trap and a self-tying knot. This creates a strong and reliable knotless repair.
- **Utility Suture Tape:** The added 1.4 mm **BIOFIBER®** Tape allows for additional tissue fixation following the primary repair. It can also be used in conjunction with the primary repair to augment the construct. The 1.4 mm **BIOFIBER®** Tape has a smaller knot stack, causing less postoperative subcutaneous irritation. The broader footprint of the 1.4 mm **BIOFIBER®** Tape also provides a low-profile repair and distributes the repair forces over a greater surface area of the tissue.

Indications:

- Remplissage
- Medial Row Cuff Repair
- Lateral Extra Articular Tenodesis
- Achilles Insertional Tendinopathy
- PASTA Repair

Ordering Information:

Cat Code	Description
10740	**FIBERKNOT®** Soft Ligament Anchor loaded with 1pc White-Black Fiber USP 2 and 1pc Solid Black Fiber Tape size 1.4, Knotless, Dia. 2.9 mm

Instrumentation:

Cat Code	Description
10716	Drill bit For **FIBERKNOT®** Soft Ligament Anchor, Dia. 2.9mm
10058	Slotted Sleeve For **FIBERKNOT®** Soft Ligament Anchor, Dia. 2.9mm
10141	Punch for Soft Ligament Anchor, Dia.2.9mm
