

## VIMFIX®-BT

### Ligament Anchor, PEEK, Knotless

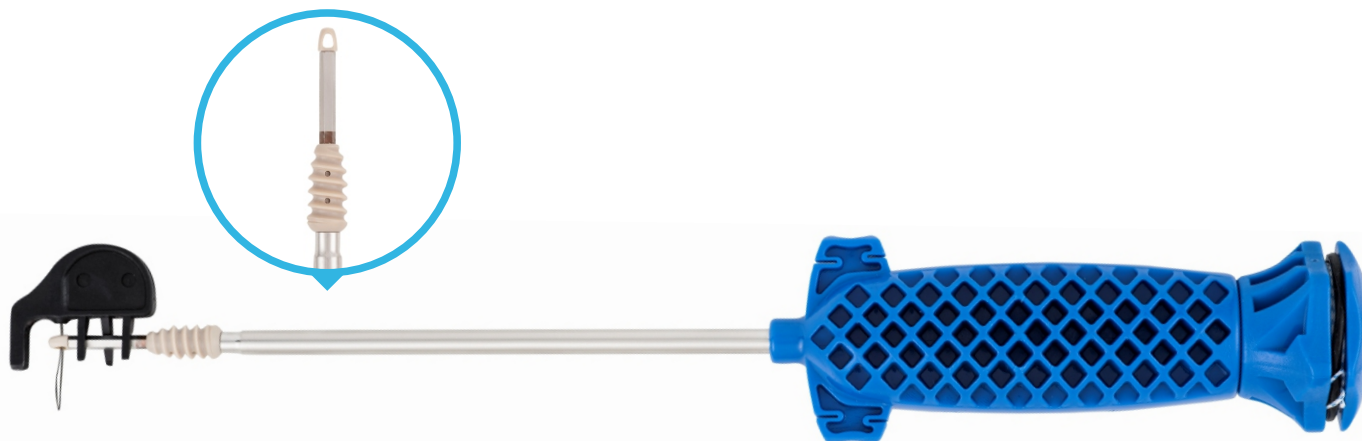

**BIOTEK** proudly presents the **VIMFIX®-BT** Ligament Anchor PEEK Knotless Tenodesis Anchor Range, a series of interference fixation anchors designed to provide secure tendon fixation in both upper and lower extremity procedures. Made from implant-grade PEEK, these anchors deliver dependable tendon compression within the bone tunnel and enable surgeons to choose the most appropriate diameter to accommodate varying graft sizes.

Modern tendon fixation demands an interference fixation solution that is simple, strong, and reproducible. The **VIMFIX®-BT** range offers reliable fixation for proximal **Biceps Tenodesis**, MCL reconstruction, LCL reconstruction, and a variety of other tendon tenodesis procedures.

### Clinical Indications:

- ▶ Proximal Biceps Tenodesis
- ▶ MCL Reconstruction
- ▶ LCL Reconstruction
- ▶ General Sports Medicine – Tendon Tenodesis, Tendon Augmentation and Soft Tissue Reconstruction

Choose an implant diameter that achieves sufficient graft compression without unnecessarily enlarging the bone tunnel, ensuring optimal fixation strength while maintaining tendon integrity.

Key Features & Benefits:

- ▶ **Interference Thread Design:** Provides circumferential compression of the tendon graft for strong primary fixation, while the atraumatic thread profile helps protect the graft during insertion.
- ▶ **PEEK Implant Material:** Manufactured from Evonik's VESTAKEEP® PEEK, offering biocompatibility, radiolucency, and MRI compatibility.
- ▶ **Multiple Diameter Options:** Available in 5 mm, 6 mm, 7 mm, and 8 mm sizes to accommodate a range of graft diameters.
- ▶ **Self-Tapping Thread Profile:** Enables smooth insertion and secure fixation with excellent engagement in both cortical and cancellous bone.
- ▶ **Large Driver Interface:** Enhances implant control and handling during insertion..

Ordering Information:

| Cat Code     | Description                                           |
|--------------|-------------------------------------------------------|
| BAS-9093.50F | VIMFIX®-BT Ligament Anchor, PEEK knotless, Dia. 5.0mm |
| BAS-9094.60F | VIMFIX®-BT Ligament Anchor, PEEK knotless, Dia. 6.0mm |
| BAS-9095.70F | VIMFIX®-BT Ligament Anchor, PEEK knotless, Dia. 7.0mm |
| BAS-9096.80F | VIMFIX®-BT Ligament Anchor, PEEK knotless, Dia. 8.0mm |
